

## ✓ WHY REED?

Rotary™ cutters are a Reed invention! Reed Rotary™ cutters cut pipe safely, easily, quickly, and at a low cost. Provides a square cut and can be used anywhere – in the ditch, underwater, in explosive atmospheres (cold cut), in noise-free zones, over head, in racks of pipes, etc. Reed Rotary™ cutters last for decades.

**Handle Extension**  
Affixes to main handle for additional leverage. Included with RC20/RC24 models.

RC20 Rotary Cutter

# REED

## Rotary™ Cutters & Low Clearance Rotary™ Cutters

Cold cut large diameter steel, most stainless steel, ductile, and cast iron pipe in close quarters. The low profile design of the LCRC models needs only 4" clearance for up to 16" pipe diameter; only 8" clearance for the **RC20** and **RC24**; and just 11.8" clearance for the **RC30** and **RC36** large diameter pipe cutters. Each cutter is supplied with a slip-on handle that is used to turn the cutter around the pipe in one direction. The handle is also used to tighten the cutter every 1/2 revolution.

Best manual cutters for ductile iron. With good leverage from long handle, pipe snaps off squarely before wheel penetrates halfway through pipe. Cutters have heavy-duty frames.

All sizes use the same cutter wheels: either RCS8-36 for steel and RC18-30 for ductile and cast iron. RCX wheels cut up to 29/32" wall thickness for steel pipe.

**For heavy wall steel and stainless steel, order RCX cutter wheels (03550) and eight RC8-30XR rollers (93222).**

### ROTARY CUTTERS

| Catalog No. | Item Code | Pipe Capacity |                     |             | Length |      | Weight |       |
|-------------|-----------|---------------|---------------------|-------------|--------|------|--------|-------|

\*EXCLUSIVE

NOTE: S= includes cutter wheels for steel; I= for cast and ductile iron. Wheels for same size cutters are interchangeable. Recommend only Reed cutter wheels be used with these cutters. Reed wheels are made from high shock-resistant tool steel on computerized (CNC) machines and then precisely heat-treated. This allows for a thinner profile yet stronger blade, so they:

- Cut easier and faster, especially stainless steel and ductile pipe
- Last much longer
- Provide the best value

### LCRC ACCESSORY

To improve use in awkward locations, Reed now offers an angled handle option that allows the user to turn the LCRC cutter from the side of a ditch, using one's body weight, rather than having to turn the cutter from on top.
